

Ouray County, 2021 Chip Seal Emulsion Bid
ADDENDUM NO. 1
March 29, 2021

To all prospective proposers under Specifications for Ouray County, 2020 Chip Seal Emulsion Bid, for which proposers are to be received by Ouray County on April 5, 2021:

The following questions were received:

1. **Does the County want “minimum delivery amount” given in terms of a per tanker delivery charge? Yes, you can provide a cost per tanker (delivery charge) with the size of the tanker.**
2. **How many deliveries per week is the County expecting for this project? We are expecting to do the entire project in 3-5 days**
3. **How many days does the County plan on renting the tanker for? It depends on the size of the tanker and whether it is heated. We hope to have the oil delivered as we use it (we can project when we need each tanker once we have a firm schedule.).**
4. **Does the County plan on moving the rental tanker around to different locations or will it stay in the location it is dropped? We will leave the tanker in one location and fill up the distributor from there.**
5. **If there are additional costs you would like to convey, please feel free to include those as well as any assumptions you are making.**
