LPHA Data Portal from CDPHE
Vaccinated people are **12.1** times less likely to be hospitalized & **10.7** times less likely to die due to COVID-19.

Vaccine Effectiveness

- **12.1** Times Less Likely To Be Hospitalized for COVID
- **10.7** Times Less Likely To Die From COVID
- **3.7** Times Less Likely To Become a COVID Case

Protect Yourself: Get Vaccinated Now

Hospital level data: Colorado

86% of Those Currently Hospitalized are Unvaccinated

176 Vaccinated Hospitalized Patients
1,051 Unvaccinated Hospitalized Patients

The vaccination status of those currently hospitalized is based on data reported daily to public health by hospitals through the Healthcare Emergency Resource Management system (EmrResource). Vaccination status of currently hospitalized individuals is reported in aggregate, and therefore not verified by public health at the patient level. EmrResource data provides a snapshot of hospitalizations in Colorado, and is meant to be used for situational awareness. For trends in the vaccination status of hospitalized cases over time, please refer to the COVID-19 Vaccinated & Unvaccinated Case Data dashboard (https://covid19.colorado.gov/vaccine-breakthrough).
COVID-19 Cases Per 100K by Specimen Collection Date & Vaccination Status

WHAT YOU CAN DO TO HELP END THE PANDEMIC

• Get a COVID-19 vaccine
• Wear a mask
• Stay 6 feet apart from others who don’t live with you.
• Avoid crowds and poorly ventilated indoor spaces.
• Wash your hands often with soap and water. Use hand sanitizer if soap and water aren’t available.

Get vaccinated to help save lives and end the pandemic.
